We are listening

Published By Peter Petrone

Our growth has been possible because of you. Listening to you has prompted us to add new services and products to keep your payment processing solutions up to date and profitable.

Introducing New Gift Card Program

The small to medium sized merchant can now offer their customer the convenience of gift cards with little up front investment and significant improvement in customer referral and retention. Please call us for details.

More Good News

Your credit card receipts are now protected against identity theft. Since last summer the customer receipt generated from your terminal now "truncates" the last four digits of the credit card number – meaning that only the last four numbers are seen on the receipt. Your receipt still prints the full credit card number for tracking and reconciling purposes.

Take Credit Cards from Your Mobile Phone!!!

Yes, you can now swipe credit cards using your mobile phone anywhere you have service. With an easy add on adapter and wireless printer you can now transact business practically anywhere. Fast, convenient, and mobile – what else will they think of next?

Why Buy New?

The pictured featured product is a refurbished Nurit 2085 with integral printer and multiple merchant ID number capability. This low profile terminal offers one button functions, a very bright screen and fast processing. Sale price \$340.00.

New Service

Single Resource Financial now offers a full array of **Leasing Services** for equipment in the \$5,000 to \$75,000 price range. All types of equipment are included as long as it is used in your business. Leasing can provide an attractive alternative to conventional financing including paying cash. Call us for more details whether buying or selling equipment.

Free Analysis

If you are having trouble understanding your monthly credit card statements please call us for a free analysis – we will gladly explain all fees and services.

Our goal is to provide you Full Disclosure and the Best Service in Payment Processing Solutions

Nurit Terminal Tip of the Month

How can your Nurit Terminal help you sell more? You can easily reprogram your own terminal to print a sales message on the customers receipt. For Example: "Save 10% on your next purchase of \$50.00 or more. (Expires xx/xx/xx)"

Call and ask us how.
